## EXPLANATORY NOTE.

---

This list includes the magazines, yearbooks, newspapers and publications of societies and institutions, which are in the library of Leland Stanford Junior University (including the General Library, Law Library and Lane Medical Library in San Francisco). Governmental publications, federal, state and municipal, have been omitted.

The entries conform to the following rules:

1. Magazines and yearbooks are entered under the first word of the title, not an article. When the name has been changed the entry is under the latest title with cross reference from the earlier form or forms.

2. Publications of societies are entered under the latest official name of the society, with cross reference from the earlier names, if such there be.

3. Learned academies, whose names begin with *Kaiserlich*, *Königlich*, *Reale*, etc., are entered under the following word, the adjective being abbreviated and disregarded in the alphabetizing. (i. e. *Die Kaiserliche Akademie der wissenschaften, Vienna*, is to be found under A as *K. Akademie der wissenschaften, Vienna*.)

4. An institution whose name begins with a proper noun or adjective is entered under the first word of its name. Other institutions are entered under the name of the city or town in which located. (i. e. *Lick observatory* is to be found under *Lick*, but *Museum of fine arts, Boston*, is under *Boston*.)

5. Newspapers are entered under the names of the places where published.

In the few cases where it has seemed advisable to depart from these rules, cross references have been made.

## ABBREVIATIONS.

---

- L following the entry means that the serial so designated is in the Law Library.
- M following the entry means that the serial so designated is in the Lane Medical Library.
- + A plus sign indicates that the set is complete from the last date given and is currently received.
- || Parallels following a date indicate that the serial ceased publication with that date.
- [ ] Brackets indicate that the volumes or dates so inclosed are incomplete.
